- IIRS-ISRO — Geo-data Sharing & Cyber Security (2023)
- NIELIT Diploma — Computer Applications & Multilingual DTP (2007)

EDUCATION

High School Diploma (Medical Sciences)

PROFILE

Computer Technician and IT business owner with 10+ years of experience in hardware/network support and client service delivery. Independently designed and built an 18-tool internal software suite (36,000+ lines of code) spanning PDF engineering, computer vision, and bulk communications — combining hands-on technical support with self-taught, applied software development.

SELECTED PROJECTS — INTERNAL SOFTWARE SUITE

Architected and built a self-contained, offline-first toolkit of 18 web applications (~36,000 lines of HTML/CSS/JavaScript) to run day-to-day document and customer operations at The Computer Services.

PerspectScan

COMPUTER VISION

OpenCV.js-based document scanner with real-time perspective correction — no physical scanner needed.

EPFO Suite

FINANCIAL LOGIC

Custom EPF & income-tax calculation engine with automatic form generation.

WhatsApp Sender ULTRA

AUTOMATION

Bulk customer-messaging tool (2,900+ lines) for notifications and follow-ups.

Additional tools: Document Vault, Compressly, StitchKit, Collage Maker, Signature/Photo Resizer, Exam Photo Resizer (UPSC/JKSSB-spec). All are self-contained, offline single-file HTML apps — no backend, no install — with requirements, logic, and UX directed end-to-end by the developer.

PDFWORK + PDF Suite

PDF ENGINEERING

pdf-lib + pdf.js powered offline editor, compressor, and PDF ↔ Image converter.

HyperTool

FLAGSHIP · 427 FUNCTIONS

11,000+ line all-in-one toolkit unifying document, QR, and data utilities.

Application Composer

DOCUMENT GENERATION

Generates formal J&K government correspondence directly from customer input.

WORK EXPERIENCE

Business Owner — The Computer Services

2013 – Present

Jammu, India

- Independently founded and operate an IT services business, managing end-to-end hardware setup, maintenance, and client support across a diverse customer base.
- Designed and built an 18-application internal software suite to digitize document processing, automate financial calculations, and streamline customer communications — eliminating manual paperwork bottlenecks at the counter.
- Diagnose and resolve complex technical issues including data recovery and system optimization, maintaining high system uptime for clients.
- Manage client accounts and design tailored IT solutions matched to individual business needs.

Operation Manager — Hemkunt Tour and Travels

Jun 2011 – May 2012

- Managed daily operations and team logistics to ensure seamless service delivery.
- Analyzed operational data to generate reports and improve internal management processes.

Territory Manager — Indian Auto Hub

Jun 2010 – Mar 2011

- Built customer relationships and resolved issues promptly to sustain high satisfaction.
- Set and achieved strategic sales targets, implementing data-driven improvements to sales operations.

Senior Process Associate / Telecommunications Coordinator — Oceanic International Call Center · Bajaj Capital Insurance Broking Ltd.

Apr 2006 – May 2010

- Managed high-volume customer communications and training programs across both roles — informing prospective students of admissions processes and building customer-service proficiency in a call center team.
- Analyzed call center metrics and interaction records to identify gaps, preserve data integrity, and improve customer satisfaction.

TECHNICAL ENVIRONMENT

Languages/Libraries: JavaScript, HTML5, CSS3, pdf-lib, pdf.js, jsPDF, OpenCV.js, Canvas API

Systems: Windows 7/10/11, Windows Server, Linux (Ubuntu/Debian), Android/iOS

Networking & Security: Cisco IOS, IPv4/IPv6, Threat Detection · AI / Dev: Gemini, AI Prompt Engineering
